

BTNS Problem and Applicability Statement

Joe Touch

David Black

Yu-Shun Wang

Doc Status

- draft-ietf-btms-prob-and-applic-00.txt
 - July 1, 2005
- Intended as starting point
 - Feedback from only two parties so far...

Structure Issues

- Basic structure of the doc?
 - Are there sections/issues missing or extra?
- Items to be addressed?
 - Autodetect
 - Upgrading
 - Any aspect of solution requirements?
 - Or is that a separate doc, or not a doc at all?

Current Feedback

- Style
 - Repetition, acronyms, etc.
 - To be corrected
 - Presentation
 - Terminology: how much to assume/educate in this doc?
- Content
 - More info on why app layer isn't sufficient
 - Add redundancy of cost, as well as of config.
 - Explain why IKE was chosen

Current Steps

- More feedback ;-)
 - Structure / high-level content
 - Clarification / pervasive wordsmith
 - Local changes
- Issue tracking
 - Informally, by number, via email?
